Train Station and Bus/Truck Stop

Bus/Tram/Trucks

Every type of vehicle has its own type of Stop.

All what you have to know is trucks cant stop at a Bus or a Tram stop.

Trucks need a special Stop for goods.

Also Busses and Trams cant stop at a truck stop.

In Game there are 3 type of Stops

Bus Stop (what you also can use for the tram)

Bus and Tram Station there are small were can stop 2 linea at the same time and Big version were can stop 4 linea at the same time.

Truck Stop there are small were can stop 2 linea each 18 goods at the same time and Big version were can stop 4 linea each 16 Goods at the same time.

Bus and Tram share the Stop which are in the game just with one limitation you cant build tram track in a Bus Station.

Train Station and Fright Yards (Goods Station)

For both of then you can choice between 160 240m and 320 with a maximum of 5 platforms.

For the Railway is the same rule as the bus, tram and truck. You can just pick up Passenger on a Rail station not on a Frigth Yard, also you cant pick up good from a Train Station.

But you can creat a mix train what can carry both passenger and goods but you have to make sure he stop on a Train Station to pick up the passenger and stop on a Frigth Yard to pick up the goods and vice versa.

Here some picture to make it easaier to understand.
